

Mobile App Manager

In Settings -> App Manager you can easily keep track of all users & resources who have access to the apps.

From here you can add/remove Users or Resources to the app and set their permissions.

In the settings tab there are general settings for each app module.

Mobile App - <https://mobile.trackplanfm.com>

- Trackplan's new consolidated mobile for all users (Facilities Managers, Maintenance Managers, Department Managers) and resources (Internal Maintenance staff, External Contractors, Engineers or Technicians).
- Consolidates feature from legacy Manager, Resource and Requestor Apps.
- A user may enable themselves as a resource to access the resource module of the app.
