

All Planned Items

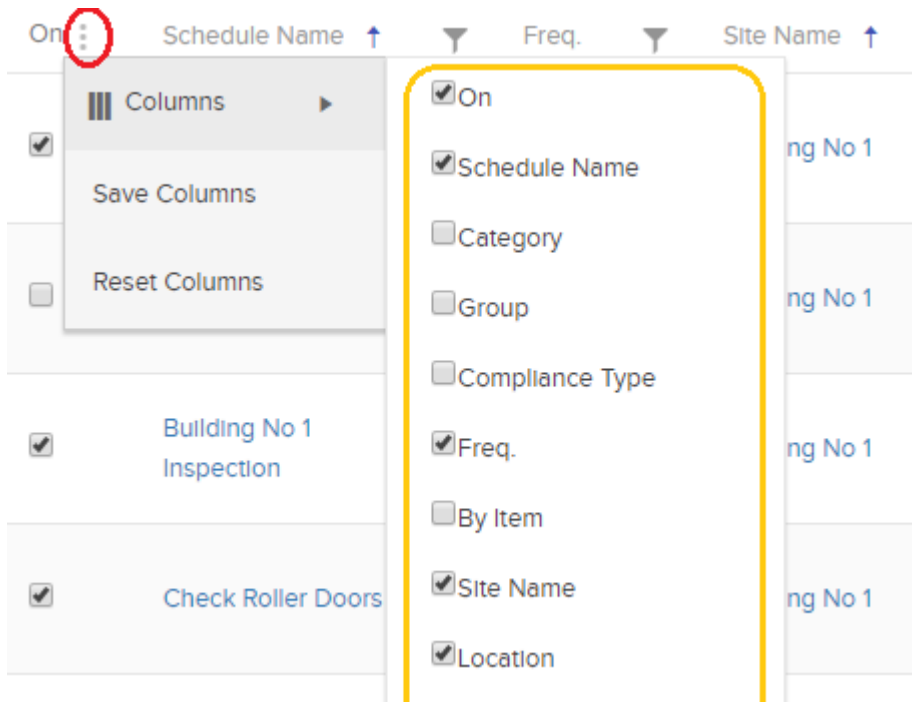

The *Planned Items* area shows planned schedules for all sites, assets, and locations. You can change the due date for the next job of any schedule, the resource and assigned user, and also deactivate the schedule to stop more planned jobs from being created.

The *Planned Items* list can be sorted by selecting any of the column headings e.g. click *Due Date* to sort by *Due Date*. The Planned Items can also be filtered by selecting the button *Filters* on the top right of the page as shown below:

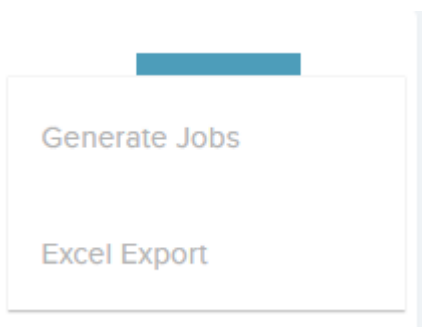

The image shows a filter panel for the 'Planned Items' section. It consists of a grid of dropdown menus organized into three rows. The first row contains: 'Planned Schedule' (please select), 'Item Active' (<Active?>), 'Contract' (please select), 'Site' (please select), 'Asset Class' (please select), and 'Asset Sub Class' (please select). The second row contains: 'Assets' (please select), 'Schedule Category' (please select), 'Schedule Group' (please select), 'Compliance Type' (<Compliance Type>), and 'Item Type' (<Item Type>). The third row contains: 'Resource' (please select), 'Assigned User' (please select), 'Location' (please select), 'Sub Location' (please select), 'Regions' (please select), and 'Site Type' (please select). On the far right of the first row, there is a blue button with a magnifying glass icon and the text 'More', followed by three dots '...'. The entire filter panel is enclosed in a light gray border.

If you would like to include particular columns in the grid and display information related to your *Planned Item*, you can do so by selecting the link shown below in the top left of the page, select columns and check the box of the attribute you would like to include in grid:

More features are available beside the *Filters*, as shown below:

- **Generate Jobs** – this will generate the jobs from schedules.
- **Excel Export** – this will allow you to export this list to an Excel sheet.
