# Asset Management in the Apps

Asset Management is now possible in the Trackplan Manager app and the Trackplan Resource app. You can manage your assets on the go with ease. You can Add, Edit Raise a Job against an Asset or add QR Code for that Asset via the Apps.

Trackplan FM

- ☰ Job List
- 👥 Resource List
- 🖥️ **Asset List**
- 📄 Form Library
- ➕ New Job
- < Logout

The in-app asset management feature allows you to view all assets,asset details, job history, and easily raise a new job against an asset. You can also create assets in the app, which is a great tool for asset gathering.

Asset List

AC Unit 234	AC Units
Asset Name	**Asset Class**
15431	Building No 15:36
Asset Code	**Site**
Location	**Sublocation**

AHU Unit	Boilers MC1
Asset Name	**Asset Class**
1234567890	Eden park
Asset Code	**Site**
Location	**Sublocation**

AHU Unit	Boilers
Asset Name	**Asset Class**
ahu-1238	Castle View
Asset Code	**Site**
Ground Floor	Atrium
Location	**Sublocation**

Air Conditioning 1	AC Units
Asset Name	**Asset Class**
x1	Eden park
Asset Code	**Site**
Building 1	First floor
Location	**Sublocation**

Air Conditioning 2	AC Units
Asset Name	**Asset Class**
a2	Fonthill 34
Asset Code	**Site**

Click on any asset to be brought to the Asset Details page and click on the pencil icon to edit the asset.

You can create a new asset from the Asset List by selecting the "+" button at the top of the page:

This will open the Create New Asset page where you can fill out all relevant information for this new asset:

☰ Create New Asset   ←

💾 CREATE

The ability to create new assets can be configured for each individual user and resource. This can be done in *Settings -> App Manager* and selecting either *Resource App* or *Manager*

App depending on which app the person is set up for.

Once in the relevant app area, you can select any user / resource and from the *App* tab you will see these options:

Assets Enabled	◉ Yes ○ No
Can Add Assets	◉ Yes ○ No

The new Asset Management feature in the apps complement and integrate with the asset management module within the main Trackplan application. This will help make creating assets, and raising jobs on-the-go even easier.
