

Asset Tree View

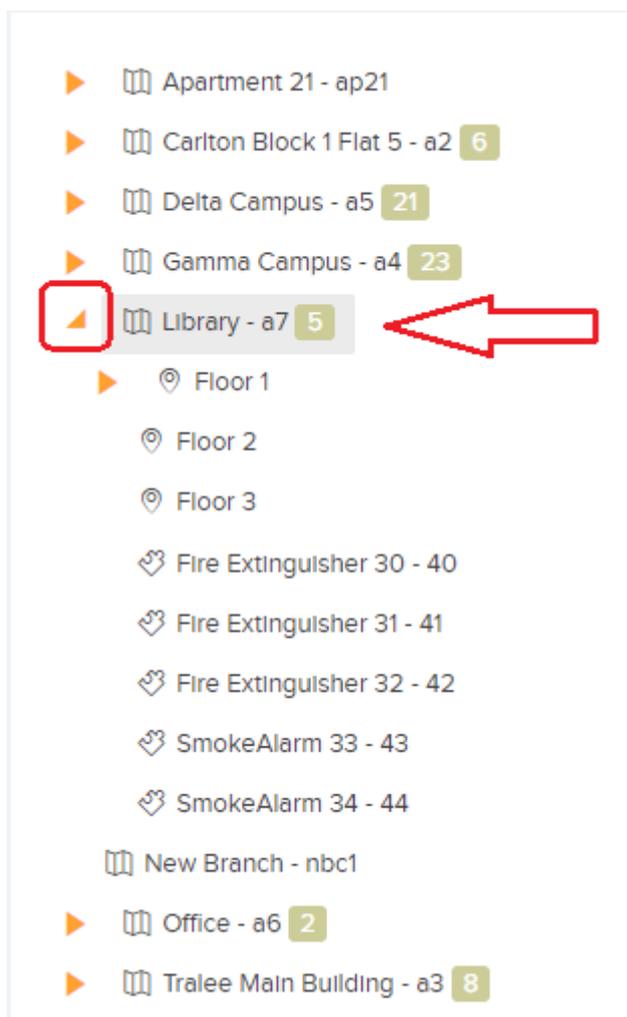

The Asset Tree View allows you to view all Assets and what Site, Location or Sub-location they are associated to.

The view can be filtered by the filters at the top of the page.

A screenshot of the filter controls at the top of the page. It consists of several dropdown menus arranged horizontally: Asset Class, Asset Sub Class, Asset Status, Contract, Site, Site Type, and Regions. Below these is a separate dropdown menu for Compliance. Each dropdown menu has a small downward arrow on its right side.

Clicking the orange arrow beside any site will expand the view to show locations and sub-locations and associated assets.

Clicking on any Site will reveal a Site Details pop-up with the option to go to the Main Site Details View.

Site Details ✕

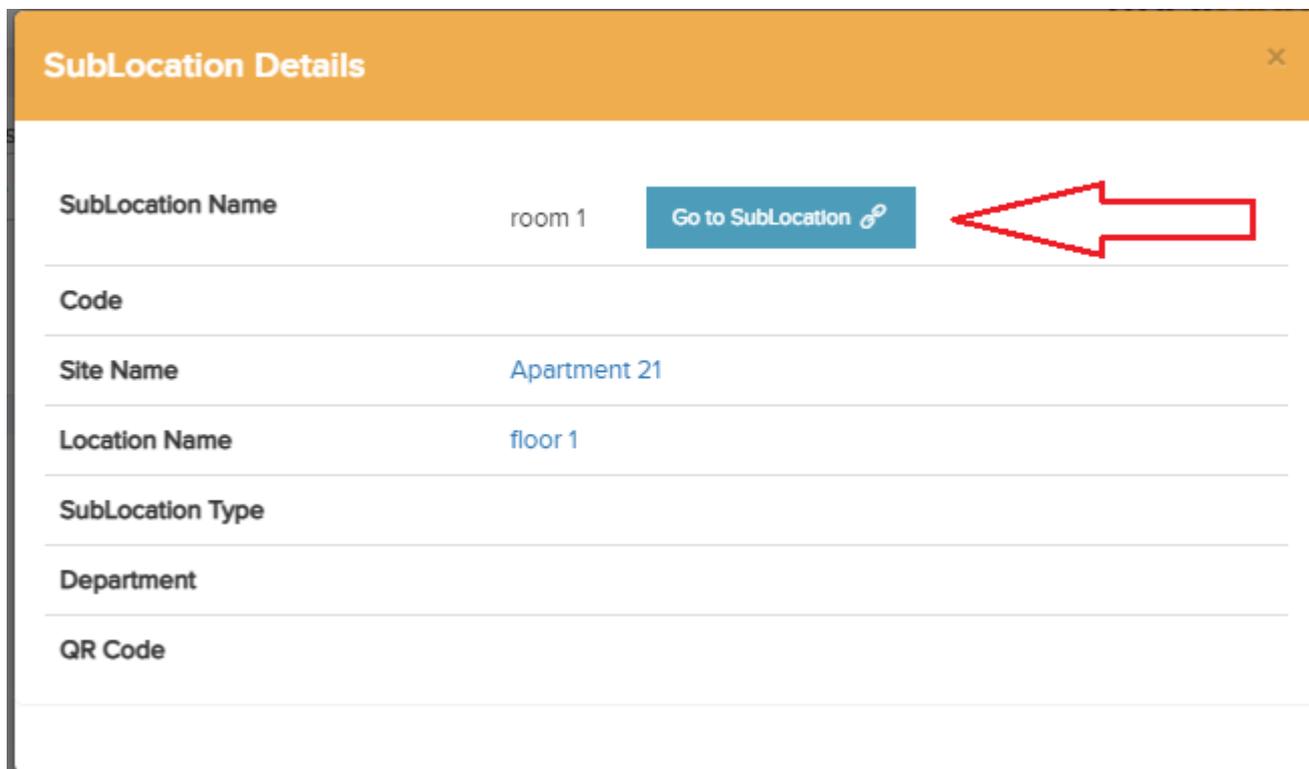

Site Name	Library	Go to Site 📄	
Code	a7		
Region	Brooklyn		
Site Type	Library		
Default Assigned User			
Default Team
