

Custom Field Names/Labels

Settings – Custom Field Names/Labels allows the user to rename all the major labels and tags in the main application.

As per screenshot below you can choose a certain view from the dropdown, Edit what tag you need to rename and click update.

****Note – Make sure to logout and login to trigger the new labels.**

The screenshot shows a settings interface for customizing field names. At the top left, a 'Views' dropdown menu is set to 'Asset Details Page'. In the top right, there are 'Excel' and 'Back to Settings Menu' buttons. The main content is a table with the following columns: ID, Original Field Name, Original Description, New Name, and action buttons (EDIT, RESET, UPDATE, CANCEL). The table contains four rows of data. The last row, with ID 227, shows 'Asset Name' as the original field name and description, and 'Equipment' as the new name. The 'UPDATE' button for this row is highlighted with an orange box, and an orange arrow points to the 'Equipment' text in the 'New Name' column. The 'New Name' column header is also circled in orange.

ID	Original Field Name	Original Description	New Name	
225	Asset Attribute Form	Asset Attribute Form		EDIT RESET
226	Asset Details	Asset Details (title)		EDIT RESET
228	Asset Details	Asset Details (tag)		EDIT RESET
227	Asset Name	Asset Name	Equipment	UPDATE CANCEL
