

# Job Quotes and Estimates

The Quotes Module is split into:

1. Contractor Quotes – Quotes that come from contractors/engineers via the Contractors Portal, Resource App or emailed into the client.
2. Sales Quotes – Sales quotes can be created independently or against a Job. For independent Sales quotes you will get an option to create a New job when quote is approved.

The *Jobs -> Job Quotes / Estimates -> Contractor Quotes* area shows a grid containing information on quotes and estimates that have been created for jobs and job tasks. You can view and edit details, add documents, submit or print the Quote / Estimate information to PDF by selecting the Quote / Estimate number (#) from the list.

You can filter the list by selecting the *Filters* button at the top-right of the page. This will reveal a number of filtering options for you to choose from:

The image shows a screenshot of a filter interface with two rows of dropdown menus. The first row contains: Quote Status (<All Statuses>), Resource (<Resource>), Contract (<Contract>), and Site (<Sites>). To the right of these is a blue button labeled 'Q More' followed by three dots. The second row contains: Location (<Locations>), Sub Location (<SubLocation>), Regions (<Regions>), Site Type (<Site Types>), Reactive / Planned (<Reactive / Planned>), and Assigned User (<Assigned To>).

Next to the *Filters* button are three dots which gives you the option to export the list to excel.

Clicking on a Quote / Estimate number will bring you to the *Quote / Estimate Details* view:
