

Location Types

The *Location Types* area allows you to view, edit, delete, or create new *Location Types* for *Locations* e.g kitchen.

To create a *Location Type* select *Add Location Type* at the top-left of the page:

The screenshot shows a web interface for managing location types. At the top left, there is a green button labeled '+ ADD LOCATION TYPE'. At the top right, there is a grey button labeled 'Back to Settings Menu'. Below these buttons is a form with the label 'Location Type Name' and a dropdown arrow. The form contains a text input field with a vertical cursor. To the right of the input field are two orange buttons: 'UPDATE' with a checkmark icon and 'CANCEL' with a circular arrow icon. At the bottom of the form, there is a pagination control showing '1' in a blue box, followed by navigation arrows, a dropdown menu set to '10', the text 'items per page', and '1 - 1 of 1 items' on the right.

This will create a new row in the list where you can input the *Location Type Name*. You can then select *Update* to save the new *Location Type* and add it to the list.

You can *Edit* and / or *Delete* the *Location Type* information once it has been added to the list.
