Tenant Id / Corporate Id	<input type="text" value="4ef6b21f-141f-4417-8ca4-cc49c7de1211"/>
SSO Behaviour	<div>Create New Account With Default Role</div>
Default User Role	<div>Full Access</div>
Default User Type	<div>(Please Select)</div>
Email Address For Receiving Notifications	<input type="text" value="pertinentpointofcontact@example.com"/>

- **Tenant ID / Organisation ID** – Configure your Microsoft Tenant ID. This is provided by microsoft and is also known as the Organisation ID.
 - **SSO Behaviour** – Set the behaviour of the system when an unregistered user signs in for the first time. Choose weather to Create a New Account or not.
 - **Default Role For New User** – Set the default role assigned to all new users created.
 - **Default User Type For New User** – Set the default user type assigned to all new users created, This will inherit all settings from that user type.
 - **Email Address For Receiving Notifications** – Email address to receive notifications from Microsoft when there are authentication issues.
-
- **Please Note** – Your organisation will need a published

active directory service with Azure to use this feature

Single Sign On for Google allows the user login using their gmail email address.
